### Info:

CODA is the first whole album of the exceptional band MIT and already a milestone in their band history. Dispensing with the noise and disco attack of their early singles, the three German teenagers of MIT have created ten tracks of minimal electronic punk - taking in urgent rhythm, aggressive tribal drums and mesmerizing synthscapes. After two EPs and the hit-single „Goodbook“ MIT changed not only the instrumentation, but also their whole style. The former noisy, electronic, fast and short punk mutated to a hypnotic, clinic but warm electro-neo-kraut-extravaganza.

More instruments, more layers, more computers, more drums, more delay, more everything... „Coda“ was recorded and produced by Namosh and Tamer Ozgonenc in MIT's home of Berlin, having moved there from Cologne. MIT have shared stages and toured with, amongst others, Von Sudenfed, Simian Mobile Disco, Gonzales, Shitdisco, Headman, Les Georges Leningrad and the Robocop Kraus.
